## **FOR IMMEDIATE RELEASE**

### **NEWS BRIEF: King & Spalding Represents Calhoun LNG in FERC Application for LNG Facility on Texas Gulf Coast**

*Thursday, April 4th, 2005*

King & Spalding LLP, a leading international law firm, is representing Calhoun LNG before the Federal Energy Regulatory Commission (FERC) in seeking permission to site, construct and operate a liquefied natural gas (LNG) facility on the Gulf Coast of Texas. Calhoun LNG is a wholly owned affiliate of Gulf Coast LNG Partners, L.P.

King & Spalding filed the FERC permit application for the facility on Calhoun LNG's behalf on March 18. A decision on the application is expected in approximately 12 months.

Calhoun's proposed terminal and associated facilities will be located in the Port of Port Lavaca-Point Comfort in Calhoun County, Texas. The LNG import terminal would be comprised of a marine berth facility designed to receive 75,000 m<sup>3</sup> to 220,000 m<sup>3</sup> ships, two 160,000 m<sup>3</sup> LNG storage tanks and a vaporization and NGL separation facility capable of a 1 bcf sendout, as well as associated utilities, infrastructure and support systems.

King & Spalding is representing Gulf Coast in all aspects of its application before FERC, as well as selected commercial and financial matters related to the project.

Gulf Coast LNG Partners, L.P. is a Houston-based partnership formed between Gulf Coast LNG, LLC and Haddington Energy Partners II, LP, a private equity fund managed by Haddington Ventures, LLC. Additional information about Gulf Coast LNG Partners, L.P. and the Calhoun LNG project may be found at [www.calhounlng.com](http://www.calhounlng.com).

King & Spalding is one of the most active advisors to the LNG industry. In the past 12 months, the firm's LNG team has advised on high-profile LNG-related transactions and projects in Angola, Australia, the Bahamas, Canada, Equatorial Guinea, Korea, Qatar, Russia, Trinidad, Venezuela, the United Kingdom and the United States. More information on the firm's LNG practice may be found at: [www.kslaw.com/practice\\_areas/energy/international\\_natural\\_gas\\_LNG.asp](http://www.kslaw.com/practice_areas/energy/international_natural_gas_LNG.asp).
